Authorization to Advertise and Bid the Cohasset Road Dig Out Project

The Cohasset Road Dig Out Project will provide for removal of damaged pavement sections by milling out the failed areas and replacing with hot mix asphalt. The boundaries are from the Chico City limits on Cohasset Road, just north of the Airport, to Mud Creek Road. The total project length is approximately 10.75 miles. This maintenance project will repair localized asphalt failures to prepare the roadway for crack sealing and chip sealing in 2020.

Asphalt concrete dig out is a process of removing the damaged portion of the traveled roadway by milling the road surface to a depth of approximately three inches and repaving the removed portion with three inches of hot mix asphalt. The engineer’s estimate for construction is $120,000 for this section of roadway.

The Department of Public Works recommends the Board of Supervisors authorize the Department to advertise and solicit bids for the construction of Cohasset Road Dig Outs.

The expenses for the project are included in the FY 2019-20 Recommended Budget for the Road Fund. There is no impact to the General fund.

Action Requested:
1. Authorize the project; and
2. Authorize the Director of Public Works to advertise and bid the project.
