**Department Summary:** (Information provided in this section will be included on the agenda. Attach explanatory memorandum and other background as necessary).

Every 10 years, since 1790, the United States completes a census to count every person living in the United States. The data from the census is used to: 1) redraw the boundaries of congressional seats and state legislative districts; 2) redraw the boundaries of county supervisorial districts; and 3) distribute billions of dollars in federal funding for state, county, and community programs. Local outreach and actions are instrumental in obtaining full and accurate counts at the local level. It will be important for a member of the Board of Supervisors to participate in the various planning and outreach efforts that occur in our communities. The Chief Administration Officer requests that the Board of Supervisors appoint one member to be that representative in Census 2020 activities. The Census 2020 will take place on April 1, 2020.
